

Joint WFP/FAO Evaluation of Food Security Cluster Coordination 2009-2013

Independent Evaluation Team Profiles

Dr. Julia Steets is currently Director of the Global Public Policy Institute. Her recent work focuses on humanitarian assistance, innovation in development, governance, monitoring and evaluation and multi-sectoral partnerships. Dr. Steets has lead a number of global evaluations including the 2010 Cluster Approach II Evaluation and provides advice to DG ECHO on a number of humanitarian issues including cluster financing. Julia Steets has a PhD in social sciences and a Masters in public administration.

James Darcy is a well known expert in international relief and development and was Director of the Humanitarian Policy Group at ODI between 2004 and 2010. He has published extensively on issues such as risk management and fragile states, food security assessment practice and conflict and social protection – and has lead a number of humanitarian evaluations including a recent inter-agency real time evaluation of the drought response in Somalia. Mr. Darcy is a lawyer with a Master of Arts in classics and philosophy.

Pierre Leguene is a senior consultant in international development and humanitarian aid, with over 15 years experience in technical (food security & livelihoods) assistance and programme management. He has a strong research and assessment background and has participated and lead a number of strategic evaluations for UN, NGO and donor agencies. Mr. Leguene has a Masters equivalent in international agricultural development.

Dr. Lioba Weingartner is a senior freelance consultant with a technical specialization and experience in food and nutrition security, rural development, resilience, gender and rights based approaches. She is a senior trainer, including as a trainer of Sphere Standards on Food Security and Nutrition and has lead and participated in many evaluations in humanitarian assistance, LRRD (linking relief, rehabilitation and development) and development cooperation. Lioba Weingartner has a PhD in nutritional sciences.
